This list compiles literature relevant to the burgeoning Indigenous-led conservation movement, be that through Indigenous Protected and Conserved Areas (IPCAs, Canada), Indigenous and Community Conserved Areas (ICCAs, global), or various other forms of Indigenous-led governance or co-governance mechanisms that elevate Indigenous rights, responsibilities, and legal traditions. The introductory Colonial Conservation section is not exhaustive, but rather provides context for the main import of the collection, which is to highlight the possibilities, successes, and challenges associated with decolonizing conservation through Indigenous-led governance. The list is global in scope but has been shaped by the Indigenous Circle of Experts' (2018) report, *We Rise Together*, which provides recommendations for facilitating IPCAs in Canada. The majority of the pieces are peer-reviewed, however some print media has also been included.

The researchers compiling this list are part of the Conservation Through Reconciliation Partnership (<https://conservation-reconciliation.ca/>), a coalition of Indigenous Elders and leaders, Indigenous and Crown governments, academics, NGOs, and conservation agencies working to facilitate Indigenous-led conservation across Canada. Two authors are also part of the Canadian Conservation in Global Context project, examining the rescaling of conservation to include a multitude of actors including Indigenous and local communities, neighbouring states, national and transnational NGOs, and market-based actors.

If you found this compilation useful, please consider citing it in your work.
